MAN OF TODAY

NEW BOSS BOTTLED INTENSE

BOSS
HUGO BOSS

BOSS
HUGO BOSS
INTENSE

BOSS
HUGO BOSS

The advertisement is a vertical split composition. The left half features a close-up portrait of a man with dark, wavy hair and a light beard, wearing a grey suit, white shirt, and dark tie. He is looking slightly to the right with a serious expression. The background behind him shows a city skyline with a bridge, likely the San Francisco Bay Bridge. The right half has a dark, moody background of a city skyline at night. In the center of this section is a bottle of BOSS HUGO BOSS INTENSE fragrance. The bottle is made of clear glass with a gold-colored cap and a gold-colored label that reads 'BOSS HUGO BOSS INTENSE' vertically. The overall aesthetic is sophisticated and masculine.

YOU NO LONGER HAVE TO CHOOSE
BETWEEN AN SUV AND A MASERATI.

Providing unparalleled style and comfort, whatever the terrain. That's why individuals who appreciate both adventure and luxury are drawn to the Maserati Levante.

Equipped with a powerful V6 engine, Q4 intelligent all-wheel drive system, 8-speed ZF transmission and sophisticated air suspension, the Levante is every inch a refined SUV. Meanwhile, its exclusive Italian styling, luxurious interior and unique exhaust note affirm its Maserati DNA.

Levante - 3.0-litre V6 twin turbo engine - 350 HP - 0 to 100 km/h in 6.0 secs - Top speed 251 km/h
Levante S - 3.0-litre V6 twin turbo engine - 430 HP - 0 to 100 km/h in 5.2 secs - Top speed 264 km/h
Model shown may not necessarily represent the features and specifications.

Take the Maserati way.

Stop gout patients' suffering.

EULAR recommendation **Keep their uric acid below 6.0 mg/dL (360 µmol/L)**¹

Gout flare-ups can be debilitating, disfiguring and distressingly painful.² And they recur. But now the management of gout is clearer.^{1,3} Studies with urate-lowering therapy show that keeping serum uric acid below 6.0 mg/dL (360 µmol/L)

enables key therapeutic goals to be met.^{2,4,5} Existing crystals are dissolved,² small tophi may disappear,² the formation of new crystals is prevented and, in many cases, flare-ups can be avoided altogether.^{2,4,5}

So the EULAR (European League Against Rheumatism) gout task force recommends the use of urate-lowering therapy in patients experiencing recurrent attacks and recommends that their uric acid level is kept below 6.0 mg/dL (360 µmol/L).¹

LETHAL OBSESSION

Weight loss is a vital part of cardiovascular risk management and weight loss with Xenical can have a significant impact upon key risk factors.^{1,5} When you help change their weight, you help change their future.

Block fat and help change their future

Information about adverse event reporting can be found at www.yellowcard.gov.uk.
Adverse events should be reported to Roche Products Limited.
Please contact UK Drug Safety Centre on: 01707 367554

PREScribing INFORMATION: XENICAL orlistat.
Indications: XENICAL is indicated in conjunction with a mildly hypocaloric diet for the treatment of obese patients with a BMI ≥ 30 kg/m², or BMI ≥ 28 kg/m² with associated risk factors. Treatment should be discontinued after 12 weeks if patients have been unable to lose 25% of their body weight. **Dosage and administration:** One capsule immediately before, during or up to one hour after meals (only 30% of calorie intake from fat). **Contra-indications:** Chronic malabsorption syndrome, cholestasis, breast feeding, known hypersensitivity to any component of the product. **Precautions:** Monitor anti-diabetic drug treatment. Co-administration of orlistat with clobazam is not recommended. Treatment may potentially impair the absorption of fat soluble vitamins (A, D, E and K); patients should be advised to have a diet rich in fruit and vegetables. The possibility of experiencing gastrointestinal events may increase when orlistat is taken with a diet high in fat. Caution should be exercised when prescribing to pregnant women. Studies have shown no interaction between orlistat and oral contraceptives, however an additional contraceptive method is recommended to prevent possible failure of oral contraception that could occur in case of severe diarrhoea. Rare cases of rectal bleeding, generally of mild intensity have been reported and prescribers should investigate further if symptoms are severe or persistent. **Drug interactions:** A decrease in clobazam levels has been observed in an interaction study. Co-administration with acarbose should be avoided. RAL values should be monitored if patient is on warfarin or other anticoagulants. Reinforcement of clinical and ECG monitoring is warranted if patient is on amiodarone. **Side effects:** Please consult the Summary of Product Characteristics for full details of adverse events. **Common:** influenza, anxiety, headache, respiratory infection, urinary tract infection, menstrual irregularity, fatigue and gastrointestinal such as oily spotting, abdominal pain, increased defecation and flatulence. Treatment adverse events in type 2 diabetics included hypoglycaemia and abdominal distension. The incidence of adverse events decreased with prolonged use of orlistat. **Serious:** Very rare cases of increases in liver transaminases and alkaline phosphatase and also cases of hepatitis. Very rare cases of bullous eruptions, diverticulitis and cholelithiasis. Rare hypersensitivity reactions of angioedema, bronchospasm and anaphylaxis. **Legal Category:** POM. **Presentations and Basic NHS Costs:** Xenical 120mg (84 capsules) £32.56. **Marketing Authorisation Number:** 101/08607/1/043 (84 capsule blister pack). **Marketing Authorisation Holder:** Roche Registration Limited, 4, Sukron Way, Shaw Park, Welwyn Garden City, AL7 1TA, UK. Further information is available on request. Xenical is a registered trade mark. **Date of preparation:** June 2007. **References:** 1. Hollander PA, et al. Diabetes Care 1998; 21: 1288-1294. 2.
